

I am concerned that a radio station that my family listens to daily could possibly be removed from the air. I understand that low power FM stations might force my station off the air. If this happens a large part of my community will be affected with the loss of a daily source of inspiration in our lives. In a day when our airwaves are so full of language and values that harm the family, losing our station (K-LOVE) would be a great blow to our ability to offer our children alternatives to listen to. There are hundred of thousands of people who support and depend on this station everyday and we would be greatly upset if we lost the opportunity to listen to our station of choice. I ask you take into consideration my preference to keep my radio station on air.
